

IT STAFFING SOLUTIONS

For companies not yet approaching the 120 user threshold, DataComCorp Management Services fills that need, within budget, on time, 24 X 7, with no employment cost.

For 15+ years DataComCorp has been an IT* Management Company in Northern California. Working with small and medium businesses to specify, implement and maintain their IT* tools, manage their technology expenses and protect their IP*.

From the garage to the boardroom, DataComCorp stays with you to provide the communications, computing, networking, security and support tools needed to achieve your sustainable advantage in today's (and tomorrow's) global market.

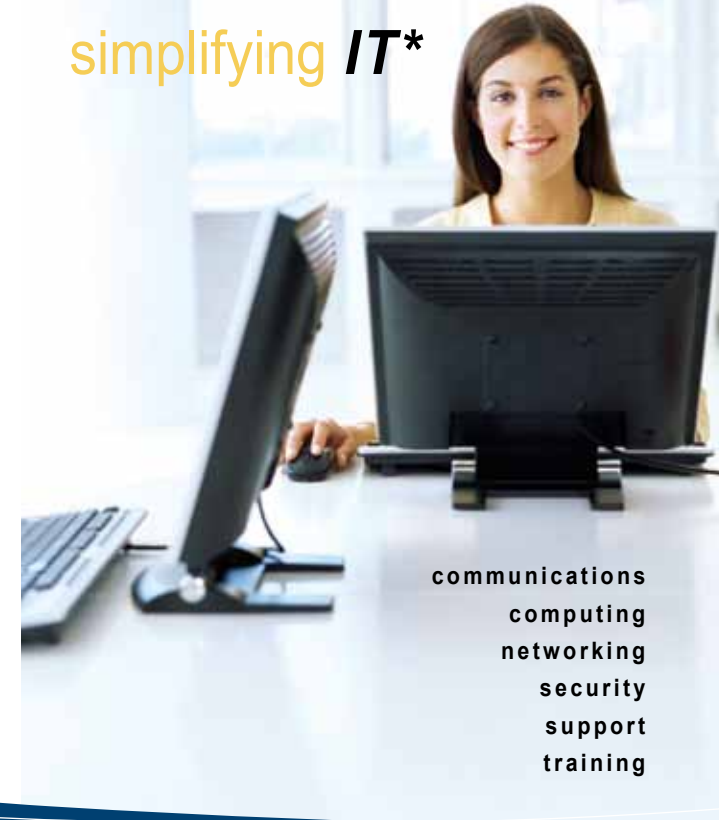

DataComCorp will:

- Review your current technology tools
- Recommend advantageous technologies
- Analyze voice and data communication
- Train users on "best practices"
- Monitor systems for greatest uptime

* Explanation of terms used in this InfoGuide:

- IT — Information Technology
- IP — Intellectual Property
- UTM — Unified Threat Management
- e-signage — electronic signage
- DCC — DataComCorp: a wholly owned subsidiary of Adalis Companies, Inc., a California C corporation

simplifying IT*

IT* solutions that work for your business

from the "technology tools people" at DataComCorp.

IT* SUPPORT SOLUTIONS

- HARDWARE SPECIFICATION
- SOFTWARE MANAGEMENT
- NETWORK MANAGEMENT
- SERVER MANAGEMENT
- SYSTEM MAINTENANCE
- ONGOING USER TRAINING

Businesses require technology tools which provide actionable data at a moments notice, all day, every day. It needs to be done transparently to the user, so they may focus on the job, not the technology. The "technology tools people" from DataComCorp know how to keep data available to your business, today and tomorrow...Contact us and we will show you how!

flexible solutions for your business needs

HYBRID LINUX OFFICE

Open source and safe. Tools not toys. Linux computing is being embraced by industry and governments around the globe. Linux OS has low cost, low management, high security and programs that are great alternatives to Windows software. Where no alternative exists there is a hybrid solution which uses Windows terminal services to provide all programs to the user in Linux.

ONSITE MANAGEMENT

Onsite, offsite, remote and phone support are all part of the technology management program at DataComCorp. We also provide scheduled support for clients wanting an IT* presence for their company. From a half day to multiple days per week, we provide the team to support your goals with no employment costs.

PROJECT MANAGEMENT

Moving out of the garage, to a new address or expanding your current space? DataComCorp will be your technology guide.

DCC SECURITY

UTM*, smart phone remote wipe and camera surveillance systems are examples of technologies we implement.

e-SIGNAGE DESIGN

Electronic signage adds an infinite variety of new and exciting communication facets for your business, customers and employees.

WE WORK WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?

A network and communications review is a great place to start. Contact DataComCorp to schedule a date and time. Sales can be reached at (408) 269-9045 ext. 803 or sales@datacomcorp.com.
